

### **Memorandum of understanding**

- To perform reforestation or forest protection activities:
  - Agroforestry systems
  - Silvopastoral systems
  - Commercial plantations
  - Assisted Natural Regeneration
  - Ecosystem restoration
  - Forest conservation
  - Others associated with the reduction of pressure on forests, such as ecotourism and environmental education.
- Minimum desirable areas:
  - Reforestation: 1.500 hectares
  - Conservation: 10.000 hectares
- Projects that have started their activities in a period of less than 4 years.
- Non-existence of land restitution claims
- Not being reported on international or national watch lists
- For reforestation projects: Not having cut down the forest to plant
- For conservation projects: Existence of forest with verifiable threat of deforestation
- To be located in the strategic areas of the Jaguar Corridor and ISA's presence (Colombia, Brazil, Chile, and Peru).
- In Chile, our focal species is the puma
- To have the documentation supporting the ownership of the land, contracts or agreements that prove their rights over the areas.
- To have the necessary resources or sources of financing to implement planting, cultivation, or conservation activities.
- Authority to make decisions as owner or representative of project owners
- Willingness to provide project information in an agile manner
- Willingness to commit to the Program through carbon credits
- Willingness to sign agreements with allies
- Generate a positive impact for the environment, the community and biodiversity.
